Detailed Description of Proposed Change

Add LinkedIn profile icons to each consultant's bio card in the consultant directory. Each bio card would display a small LinkedIn icon that links to the consultant's public LinkedIn profile (URL supplied by the consultant).

Affects ~50 launch-tier consultant cards. Out of scope: any other social platforms; LinkedIn data scraping; sign-in-with-LinkedIn functionality.

Justification for Proposed Change

Marketing Lead reports that prospects researching consultants typically check LinkedIn profiles. Providing direct links from each bio reduces friction and reinforces credibility. Sales Lead supports — current process requires prospects to search consultant names manually. Low-effort, high-perceived-value change.

Impacts (Summary)

Scope: +1 small element on bio card; +1 data field collected from consultants (LinkedIn URL).
Requirements: Adds F-08 LinkedIn-link display to RTM.
Cost: Estimated +$400 (Bob 4 hrs frontend; Christine 2 hrs to collect URLs from launch-tier consultants). Drawn from contingency.
Schedule: No critical-path impact. Work fits in existing build buffer.
Quality: No additional accessibility or performance concerns; LinkedIn icon is a well-understood pattern.

Justification (CCB / Sponsor)

Approved by Mary (Sponsor), Oct 17, 2026. Sponsor reviewed alongside the Marketing Lead's broader launch-readiness brief. Cost ($400) drawn from remaining contingency ($11,200 → $10,800). Sponsor noted the LinkedIn-link addition as consistent with the F500-credibility theme that drove CR-007. Marketing Lead notified; Christine to begin collecting LinkedIn URLs immediately.
