BUSINESS CASE

Project Title:	Mary's Consulting – New Company Website	Date Prepared:	April 20, 2026

Business Need / Problem Statement

The current Mary's Consulting website is outdated, does not reflect the firm's global scale of 500+ consultants, and does not effectively position the brand for Fortune 500 buyers. Marketing is unable to update content without engineering help, lead-capture is manual, and the site is not mobile-responsive or accessibility-compliant. As a result the firm is losing inbound opportunities and brand credibility relative to competitors.

Strategic Alignment

Supports the FY2026 corporate strategy to grow the Fortune 500 client base by 15% and to modernize the firm's digital footprint. Aligns with the brand-refresh initiative championed by the CEO.

Situational Assessment

- Current site built ~7 years ago on an unsupported CMS
- Average page load > 6 seconds; bounce rate ~62%
- Mobile traffic is now 48% of visits but UX is desktop-only
- Competitors have launched modernized sites in the past 18 months
- Marketing reports a backlog of ~30 content updates blocked on IT

Alternatives Considered

Option	Description	Cost	Recommendation
1. Do nothing	Keep current site as-is.	$0	Rejected – continued brand and lead loss.
2. Patch existing site	Visual refresh on current platform.	~$40K	Rejected – CMS unsupported, limited gains.
3. Build new site (recommended)	New responsive, accessible, CMS-driven site with CRM integration.	$150K	**Selected**
4. Outsource fully managed site	Third-party hosted marketing platform.	~$220K + recurring fees	Rejected – higher TCO, less control.

Recommended Solution

Option 3 – Build a new company website with modern responsive design, an editor-friendly CMS, accessibility compliance, and CRM integration for lead routing. Total budget $150,000 USD; target launch within 6 months of charter approval.

Financial Summary (3-year)

Item	Year 1	Year 2	Year 3	Total
One-time build cost	$150,000	–	–	$150,000
Hosting / maintenance	$8,000	$10,000	$10,000	$28,000

Total Cost	$158,000	$10,000	$10,000	**$178,000**
Estimated incremental revenue from new leads	$120,000	$240,000	$300,000	$660,000
Net Benefit	($38,000)	$230,000	$290,000	**$482,000**

Key Risks

- Brand-direction approval bottleneck (CEO is sole approver)
- Content readiness from globally distributed consultants
- CRM integration complexity
- Schedule pressure due to FY2026 marketing campaign timing

Recommendation

Approve the project, fund $150,000 USD from FY2026 marketing/operations capital, and authorize the project sponsor to charter the project under Andrew as Project Manager.
